DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, drawn to claims 1 – 5, which claim a memory circuit comprising: a regular memory cell array; a redundant memory cell array ...; a redundant replacement memory ...; and a pre-charge circuit ..., wherein depending on the data on the failed portion, the failed portion in the regular memory cell array is replaced with the redundant memory cell array, while a pre-charge path is closed which leads to the pre-charge circuit corresponding to the failed operation.

Group II, drawn to claims 6 – 11, which claim a memory circuit comprising: a regular memory cell array; a redundant memory cell array ...; and a redundant replacement memory ..., wherein the redundant replacement memory includes a redundant cell holding failed portion data, and a redundant latch circuit for latching the failed portion data held by the redundant cell,

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

6. A shortened statutory period for response to this action is set to expire 1 (one) month and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02(b)).
